Test Descriptions

Vertical Jump- Total Power

To measure vertical power production of the full body using a countermovement jump WITH the use of arm action. The results are listed in inches(in).

Height: The height achieved by an athlete in a particular jump.

40 Yard Dash

To measure the acceleration of athletes sprinting in a straight line. Multiple splits are measured (10, 20, 40). Also velocity is given in MPH at the 10 and 40 yard intervals.

Pro Agility

To measure acceleration, deceleration, change of direction, positive body control while performing a 5-10-5 Shuttle. The results are listed in seconds(s). Compare the first split of the Right drill to the first split of the Left drill to see the difference in the strength of the right leg as compared to the left leg.

Broad Jump

To measure the explosive power of the legs. Standing on the line with both feet, distance is measured to the point where the back of the foot contacts the ground.

L Drill

To measure agility, change of direction, and balance. Time given is the total time of the drill.
